

Considerations of project types that potentially trigger ALP modifications

1. Proposed Project modifies current building footprint and site.
2. Height of current building modified.
3. Project scope adds structure in the airport property.
4. Any items modified on an existing roof. (HVAC unit, etc..)
5. Any fence relocated or modified.
6. Potential impacts to aeronautical operations including but not limited to taxilane, taxiway, runway modifications.
7. Changes during construction altering the proposed project parameters.

What is to be submitted to FAA for review and approval at the design stage?

The ALP

Time frame required for FAA approval:

90 days to 180 days based on the size of the project.
